MARS 28, 2023

# **1 Introduction**

Monopoly assistance was needed to assist players to get rid of the paper money when playing and make that process easier using web application.

# **2 Problematic**

Playing monopoly is really fun, but it takes a lot of time, which causes many of your friends to refuse to play it, that what will make playing it not fun. One of the things that causes it to take very long is the money transactions between players, or with the bank/government, especially when you don't have the change to pay the right amount of money.

# **3 Objectives**

In this web app we will minimize the time it takes to make a transaction between two players or between a player and the bank/government, where the transactions are going to be made digitally, and the money holding will be virtually
